

Girl Scout Volunteers Join Us to Learn How Easy Doing STEM Activities with Your Troop Can Be!

You don't have to be an expert scientist to do fun and educational activities relating to STEM (science, technology, engineering and math) with your Girl Scouts. Join us for this great hands-on "SciGirls" training to learn how easy it can be!

What will the training be like?

SciGirls is an Emmy-award winning PBS KIDS television series and website dedicated to changing the way millions of girls think about STEM. Local educators are invited to participate in a hands-on, minds-on Professional Development Training hosted by the Science Center of Iowa. We welcome you to practice proven strategies for engaging girls in STEM while building a device to measure wind speed, lighting up a room with dough creatures, and much more!

Participants attending this workshop will:

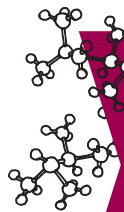

- Learn the latest research for exciting and engaging girls (and boys) in STEM
- Experience hands-on STEM activities
- Learn how to modify activities to engage kids in STEM using the SciGirls Seven
- Discover additional online resources that enhance teaching and learning experiences for all kids.

How do I register?

Go to our website at girlscoutsiowa.org! Click "Events," and find the event by searching for "Science Center" or scrolling down to your chosen session date. Simply click on the event and select "Register now" to follow the easy online registration process.

Have questions? Email us at info@gsiowa.org, or give us a call at 800-342-8389!
